K. MUTHU

Flutter Developer | Android Kotlin Developer

k.muthu1809@gmail.com 9787698254 Madurai, Tamil Nadu, India linkedin

PROFESSIONAL SUMMARY

Flutter and Android Developer with 3+ years of professional experience in developing mobile applications using Flutter, Dart, and Kotlin. Skilled in responsive UI development, REST API integration, MVVM architecture, and state management using Provider, GetX, and BLoC. Experienced in Firebase Authentication, Firebase Cloud Messaging, SharedPreferences, application maintenance, bug fixing, testing, and Android application deployment through Google Play Console. Hands-on experience in developing mobile applications for tailoring, food delivery, taxi booking, parcel delivery, field management, and loan collection.

PROFESSIONAL EXPERIENCE

Mobile App Developer 09/2023 – Present | Dindigul
Dreamzcoder Software Solution

- Develop mobile applications using Flutter, Dart, and Android Kotlin.
- Design and implement responsive, user-friendly UI screens for Flutter and Android applications.
- Integrate REST APIs using HTTP and Retrofit for application data communication.
- Implement JSON parsing for handling API responses.
- Apply MVVM architecture for organizing application code.
- Implement state management using Provider, GetX, and BLoC.
- Integrate Firebase Authentication for user authentication features.
- Implement Firebase Cloud Messaging for push notifications.
- Use SharedPreferences for local data storage and application preferences.
- Fix application bugs and perform application maintenance and testing.
- Implement UI designs and improve application performance.
- Handle end-to-end mobile application development, including UI development, API integration, testing, and deployment.
- Publish and manage Android applications on Google Play Console, including releases and updates.
- Handle application maintenance, bug fixing, testing, and production support independently.

TECHNICAL SKILLS

Programming Languages
Dart, Kotlin

State Management
Provider, GetX, BLoC

API Integration
REST API, HTTP, Retrofit, JSON Parsing

Local Storage
SharedPreferences

Mobile Development
Flutter, Android Development, Android UI Development, Responsive UI, Activities & Fragments

Architecture
MVVM Architecture

Firebase
Firebase Authentication, Firebase Cloud Messaging, Push Notifications

Development Tools
Android Studio, Git, Postman, Google Play Console

EDUCATION

Bachelor of Science in Information Technology & Management (B.Sc.IT&M) 2020 – 2023 | Karumathur, Madurai
Arul Anandar College
CGPA: 7.57

PROJECTS

AlterHub – Tailoring & Stitching App
End-to-End Flutter Developer
Technology: Flutter
- Developed the tailoring and stitching mobile application using Flutter.
- Designed and implemented responsive user interfaces.
- Implemented customer measurement management features.
- Developed stitching order management and order status tracking functionality.
- Handled end-to-end application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.

Do N Key – Taxi Booking App
End-to-End Android Developer
Technology: Android (Kotlin)
- Developed the taxi booking application using Android Kotlin.
- Implemented user and driver interfaces.
- Developed ride tracking features.
- Implemented notification-related functionality.
- Handled end-to-end Android application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.

Redzo – Food Delivery App
End-to-End Flutter Developer
Technology: Flutter
- Developed the food ordering and delivery application using Flutter.
- Implemented restaurant listing and food ordering features.
- Worked on payment-related features and order tracking.
- Implemented notification-related functionality.
- Handled end-to-end application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.

R Dhuniya – Parcel Delivery App
End-to-End Android Developer
Technology: Android (Kotlin)
- Developed the parcel booking and delivery tracking application using Android Kotlin.
- Implemented parcel booking and delivery tracking features.
- Developed rider management functionality.
- Implemented notification-related features.
- Handled end-to-end Android application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.

Field Management App
End-to-End Flutter Developer
Technology: Flutter
- Developed the field activity management and data collection application using Flutter.
- Implemented field activity and data collection features.
- Integrated APIs for application data handling.
- Designed and implemented application UI screens.
- Handled end-to-end application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.

Pannai Loan Collection App
End-to-End Android Developer
Technology: Android (Kotlin)
- Developed the loan collection application using Android Kotlin.
- Implemented customer details management features.
- Developed collection activity management functionality.
- Designed and implemented Android UI screens.
- Handled end-to-end Android application development, including UI development, feature implementation, API integration, testing, debugging, and deployment.
